

JIM LEWIS

We had the good fortune of connecting with Jim Lewis and we've shared our conversation below.

Hi Jim, what is the most important factor behind your success?

Trust. I have been able to develop trusting relationships with clients, mentors, business partners, and teammates.

I also believe our company has been able to develop trust with our clients that we will do what we promised to do when we say we are going to do it and will look out for their best interest.

Meet Jim Lewis: Company President and Water Treatment Specialist

What should our readers know about your business?

I am most proud of the innovative solutions we have provided our clients to manage and address their individual water and wastewater issues to ensure that they meet all environmental regulatory requirements and operate their facility efficiently. Several of our systems have won state and national awards of excellence. It has not been an easy journey, but our team dedication to taking care of our clients has provided the success we strive for.

If you had a friend visiting you, what are some of the local spots you'd want to take them around to?

I am somewhat of a history nerd so I would take them to places such as Atlanta History Museum, the Booth Museum in Cartersville, and Kennesaw Mountain National Park for the great museum and hiking trails. I would also take them hiking on some of the wonderful trails such as Red Top Mountain State Park and Pine Mountain in Cartersville.

I would want to take them to eat at Table 20 in Cartersville, Chops in Atlanta and any of the La Parilla Mexican restaurants in Atlanta.

The Shoutout series is all about recognizing that our success and where we are in life is at least somewhat thanks to the efforts, support, mentorship, love and encouragement of others. So is there someone that you want to dedicate your shoutout to?

Brian Rindt – Senior engineer and company founder; collaborative/mentor relationship for over 30 years Sean Nicholl – CEO and business partner; collaborative partnership in building and growing our business Teammates – Our high skilled and dedicated team of engineers, construction managers and operators.
